## MEMORANDUM

To: John Leach, CBS Administrator  
From: Garry White, Director  
Subject: GPIIP Traffic Management and Vehicle Operations Policy

### **Introduction**

The GPIIP Board in November 2025 discussed and recommended requirements for Commercial Vessel Movement Operations within the GPIIP. The Board recommended the CBS Assembly approve the requirements as presented with a caveat that a policy be developed for when the requirements would be implemented.

The attached GPIIP Traffic Management and Vehicle Operations Policy for the Board was developed by the GPIIP Director using generalized best-practice patterns drawn from widely adopted industrial, port, and shipyard traffic management frameworks, combined with specific operational context in Sitka and the Commercial Vessel Movement Operations Requirements.

The draft policy addresses that the GPIIP is an industrial park and not a public roadway. It allows for industrial vehicle activities, including vessel movement. The policy establishes a clear, enforceable framework for managing vehicle and equipment traffic to protect public safety, preserve municipal infrastructure, and support continued industrial activity.

The GPIIP Board met on January 15<sup>th</sup> and approved the following motion:

**Motion:** M/S Goeden/Howard move to recommend Assembly approval of the GPIIP Traffic Management and Vehicle Operations Policy as amended by the Board.

**Action:** Passed (3/0) on a voice vote.

### **Background**

As the GPIIP has been developed over the years, traffic management has started to become a concern with multiple different commercial and industrial activities, along with the public travel in the park. In the spring of 2024, the GPIIP Board recommended a commercial bus and for-hire vehicle policy for the GPIIP, which is included in the draft document.

### **Additional Information**

Sitka General Code 2.100.100 – Adoption of Regulations states the following:

“The board of directors shall adopt regulations for the administration of the industrial park. The board shall submit regulations to the assembly for review prior to final adoption.”

### **Action**

- CBS Assembly approval of the GPIIP Traffic Management and Vehicle Operations Policy.
