

POSSIBLE MOTION

I MOVE TO approve temporary natural resource extraction and mining support facilities (rock screening and crushing) at 300 Airport Road and 227 Tongass Drive in the public lands district as requested by the Southeast Alaska Regional Health Consortium and subject to the conditions of approval listed in the staff memo. I further move to find that the use is in the public interest, all reasonable safeguards are to be employed to protect the surrounding area, and that there are no reasonable alternative locations for the use.
