

EXAMPLES OF
AERIAL ADVENTURE PARK PROJECTS
COMPLETED BY SYNERGO -
THE PROPOSED
DESIGNER/FABRICATOR/INSTALLER

SYNERGO LLC

PROJECT TEAM

ERIK MARTER - CEO & FOUNDER

With over 25 years of experience in the field, Erik's career has been formative in the direction of our industry. He served for a number of years as the Board Chair of the Association for Challenge Course Technology and continues working on improving the standard setting organization. Erik actively consults in the creation of legislation affecting the challenge course and zip line industry; working with regulators in the states of Washington, Hawaii, Oregon and California to help guide their process in ensuring that challenge courses, adventure parks and commercial zip lines are being built and used appropriately. Erik is responsible for driving our projects forward in the right direction.

JENNIFER MARTER - CEO & FOUNDER

Jennifer graduated from the University of Connecticut with a degree in Child Development and Family Counseling. Her early work with the YMCA led to a career developing recreational programs serving youth and families before joining Erik at Synergo. Jennifer currently oversees client management; working with our Facilitation, Training, Inspection and Accounting Department heads to serve the needs of our clients. Jennifer handles all our contracting needs. Change orders and insurance inquiries are all within her purview.

KYLE BRUSER - CHIEF OPERATING OFFICER

Kyle is in many ways a living product of our industry. Attending summer camps with challenge courses and ziplines starting at the age of ten, Kyle eventually became a counselor and facilitator. After graduating from Columbia University in 2009, he moved to Portland, OR. He has been with Synergo for 5 years as a builder, facilitator, inspector, gear expert and project manager. Kyle ensures all departments in Synergo are in communication with one another and that deadlines are met. Kyle is also responsible for commissioning processes of our projects and making sure all documentation is complete and in order.
